

Bryan D. Payne

INFORMATION SECURITY EXECUTIVE

✉ bdpayne@gmail.com ☎ 650-282-0311 in bdpayne

Information security executive with 25+ years of experience across some of the world's most complex security environments—from the NSA to Netflix to AWS to Adobe. I drive cultural change that makes security a business enabler rather than a blocker. I specialize in organizational transformation, repeatedly rebuilding teams into high-performing units, and in assessing and reducing risk at scale across massive, interconnected systems.

PROFESSIONAL EXPERIENCE

Adobe

SAN JOSE, CA

Vice President, Product and Software Security

5/2024 - PRESENT

Leading security for Adobe's creative and enterprise products, used by hundreds of millions of customers worldwide.

- Leading Adobe through an unprecedented security transformation due to frontier AI model security capabilities: creating the strategy and leading through attack surface reduction, vulnerability discovery, and more.
- Overseeing the shift to an agentic-enabled security program to operate at machine speed with AI Factories.
- Leveraging AI to scale product security including bug bounty triage, vulnerability discovery, and bug remediation.
- Rebuilding organizational health and developing a stronger leadership team through hiring and mentoring.
- Driving a strategic vision towards centralized software infrastructure (i.e., "paved roads").
- Leading a global organization with 120 people in the US, EMEA, and India.

Amazon Web Services (AWS)

CUPERTINO, CA

Director, AWS Vulnerability Management

3/2023 - 4/2024

Led vulnerability management for all AWS Services and all Amazon corporate endpoints.

- Maintained an industry-leading vulnerability patch performance across AWS, meeting a high internal security bar and satisfying more than fifty different compliance programs.
- Improved metrics, executive reporting, dashboards, and data quality across tens of millions of instances.
- Partnered cross-functionally with central engineering teams to simplify software patching at scale.
- Rebuilt organizational health for people, technology, and stakeholder relationships.
- Led an organization with 175 people including software engineers, security engineers, technical program managers, data engineers, and industry specialists.

BetterUp

SAN FRANCISCO, CA

Executive Vice President, Chief Information Security Officer

12/2021 - 11/2022

Built the security program at BetterUp from the ground up.

- Built a new Information Security function including a lean team that covered GRC, Incident Response, and Product & Enterprise Security while operating as a player-coach, taking on executive and IC roles as needed.
- Led a security culture shift across BetterUp with a focus on influence through strong cross-functional partnerships.
- Matured the compliance program for a successful ISO 27001 audit and laid the foundation for FedRAMP ATO.
- Matured the security incident response program to reduce risk by faster response times and improved coordination with legal, communications, customer support, engineering, and analytics teams.
- Performed technical security work as needed including product security reviews, cloud infrastructure security reviews, AWS account management, asset inventory creation, etc.
- Grew the team from 2 to 12 people with a focus on inclusion and technical excellence.

Netflix

LOS GATOS, CA

Director, Product & Application Security

4/2017 - 10/2021

Manager, Product & Application Security

4/2016 - 4/2017

Manager, Platform Security

4/2015 - 4/2016

Led a broad scope organization responsible for product security, trust and safety, infrastructure security, security software services, and security program management.

- Oversaw teams building and operating production security services across identity, cryptography, fraud detection, and threat visibility—forming the security backbone of one of the world's largest streaming platforms.
- Built security culture based on a "context not control" partnership model.
- Led team through creation and launch of award winning bug bounty program.
- Created fraud and abuse team that saved Netflix tens of millions of dollars in their first 18 months.

- Led transformation of central engineering services to secure by default model using both network and scale economies as strategies for adoption and long term efficiency.
- Partnered with senior leadership and business stakeholders to guide strategic security direction.
- Hired and coached top security, software engineering, and management talent.
- Built an industry leading security team from 3 to 70 people.

OpenStack Security Group (OSSG)

Co-Founder

10/2012 - 3/2015

Created and led the global security team for OpenStack, an open source cloud computing infrastructure software project.

- Grew the team to over 200 contributors from around the world in 2 years
- Co-authored the OpenStack Security Guide that is now the official security documentation for OpenStack
- Created the OpenStack Vulnerability Management Team (VMT), and successfully integrated them into dozens of global open source software projects
- Created and integrated a security review process for code changes to core OpenStack projects
- Led a threat analysis function to help prioritize security investments across the OpenStack ecosystem
- Contributed to architecture and development of volume encryption and public key infrastructure (PKI) subsystems

Nebula

MOUNTAIN VIEW, CA

Director, Security Research

4/2012 - 3/2015

Led security at startup; responsible for product security vision and technical sales for security focused enterprise customers.

- Led security of an enterprise software product including vulnerability management, detection and response, compliance, product security, and creation of security features
- Turned security into a competitive differentiator by mitigating cloud-specific threats
- Architected and wrote software for many security features: self-bootstrapping public key infrastructure (PKI), release signing, logging subsystem, trusted platform module (TPM)-assisted boot attestation, orchestration for operating system hardening, and runtime security monitoring
- Hired and led a team of security software engineers

Sandia National Labs

ALBUQUERQUE, NM

Principal Member of Technical Staff

6/2010 - 4/2012

- Led four research teams focused on classified projects in virtualization and cloud security
- Co-authored research proposals that secured internal and external funding for new projects
- Created LibVMI, an open source library that simplifies memory access and event-driven monitoring of virtual machines. This work was funded by an Early Career Laboratory Directed Research and Development (EC-LDRD) grant from Sandia, and was recognized in Sandia's *Lab Accomplishments*

Georgia Institute of Technology

ATLANTA, GA

Research Scientist & Graduate Research Assistant

8/2005 - 6/2010

BAE Systems

ARLINGTON, VA

Senior Software Engineer

3/2003 - 8/2005

National Security Agency

FORT MEADE, MD

Security Engineer & Researcher

5/1998 - 3/2003

EDUCATION

CISO Certificate Program

CARNEGIE MELLON UNIVERSITY, PITTSBURGH, PA

Ph.D. in Computer Science

GEORGIA INSTITUTE OF TECHNOLOGY, ATLANTA, GA

M.Sc. in Computer Science

UNIVERSITY OF MARYLAND, COLLEGE PARK, MD

B.Sc. in Applied Science

WASHINGTON UNIVERSITY IN ST. LOUIS, ST. LOUIS, MO
